

## Success Story: Ring Container Technologies Automates Nightly Backups with EVS Intelligent Backup™ powered by Asigra

### Ring Container Technologies Profile

- Multinational corporation with 22 locations in the United States, Canada and Europe
- Headquartered in Oakland, Tennessee
- Focused on the consumer packaging industry
- Customers include Cargill, Del Monte, Riley Foods Company, Unilever and Ventura Foods, LLC – to name a few
- Member of the Sustainable Packaging Coalition

## Ring Container Technologies Overview

RING Container Technologies is a privately held, multinational corporation with 22 locations in the United States, Canada and Europe. The company is focused on developing innovative and sustainable solutions for packaging consumers. Headquartered in Oakland, Tennessee, the company began operations in 1968. Through steady growth it is now one of the largest plastic container manufacturers in North America.

## Multiple Worldwide Manufacturing Plants with Varying Network Connections

Ring Container Technologies has numerous manufacturing plant locations in the U.S., Canada, and abroad. Remote locations and varying network connections created a challenge in finding a solution that would function across the board. Before coming to EVS, Ring Container Technologies was using a different cloud backup solution which was very basic and manually-intensive.

## Consistent Nightly Backups at All Locations

EVS was able to install the EVS Intelligent Backup™ powered by Asigra, at more than 24 plant locations in the U.S., Canada, and the UK, as well as on some desktops and laptops. The solution provided Ring Container Technologies with a competitively-priced solution that would provide consistent nightly backups at all sites, even those with slower network connections. Because the data transfer is done completely over the network, managing sites in Canada and the UK presented no extra challenge to the EVS team.

The previous solution was a web-based interface that required more hands-on interaction. By comparison, the EVS solution powered by Asigra could be installed on a file server, and was fully automated and managed by EVS.

## Eliminated Manual Intervention

De-duplication reduced the amount of data transmitted over some location's slower network connections. Ring Container Technologies saw an immediate reduction in direct labor inputs, and was able to provide ongoing customer service by ensuring that important data related to business operations and shipping from plant locations was consistent.

Because the Asigra solution was fully automated and managed, Ring Container Technologies employees didn't have the hassle of managing a backup solution on their individual systems. Ultimately, the enhanced efficiency didn't come at the expense of additional manpower, which allowed IT resources to be focused in other directions.

“EVS was able to offer us a high quality, cost-effective, and highly customized solution for our manufacturing plants across the United States. We also value the personalized service and the certified technical team working everyday to assure that our backups are successful.”

-Brian Didlake, IT Operations Manager,  
Ring Container Technologies

## About EVS Corporation

EVS Corporation is an award-winning cloud backup and data recovery company trusted by banks, healthcare providers, manufacturers and more. EVS offers its business customers turn-key data backup, disaster recovery, and storage solutions, as well as professional storage management and consulting services. Our industry-leading solutions are backed by dedicated and seasoned professionals unified in providing the best in customer service.

EVS Corporation offers a full suite of cutting-edge cloud backup and recovery products, including Intelligent Backup™ powered by Asigra, Echo™, data storage hardware, and EVS Resilience™.

EVS Founder Gayle S. Rose was honored with MBQ CEO of the Year Award in 2012. The company was honored with several awards from Asigra, including Best Mobile Cloud Backup Award in 2011, Customer Service Award in 2010, and Partner of the Year and Technical Innovation Award in 2009. EVS has been named one of Business TN Magazine's Hot 100 in 2008 and 2009.

EVS Corporation is headquartered in Memphis, Tennessee.

## About Asigra

Trusted since 1986, Asigra provides organizations around the world the ability to recover their data now from anywhere through a global network of partners who deliver cloud backup and recovery services as public, private and/or hybrid deployments. As the industry's first enterprise agentless cloud-based recovery software to provide data backup and recovery of servers, virtual machines, endpoint devices, databases and applications, SaaS and IaaS based applications, Asigra lowers the total cost of ownership, reduces recovery time objectives, eliminates silos of backup data by providing a single consolidated repository, and provides 100% recovery assurance. Asigra's revolutionary patented Recovery License Model provides organizations with a cost effective data recovery business model unlike any other offered in the storage market. Asigra has been recognized as a Gartner Cool Vendor and has been included in the Gartner Magic Quadrant for Enterprise Backup and Recovery Software since 2010.
