Securing Essential Business Documents: SaaS Backup for Box

Benefits for Managed Service Providers

- Multitenant support increases backup and recovery efficiency
- Client specific dashboards allow admins to monitor job status by client
- Detailed billing reports by client simplify billing admin processes
- Multiperson Approval prevents unauthorized access and data loss from human error

Core Capabilities

- Comprehensive Box support ensures all critical client data is protected
- Highly secure architecture protects client data from human error and attackers
- Modern UI simplifies backup and restore processes improving workload and efficiency
- Storage flexibility allows client data to be stored where needed to meet client needs for compliance

Box is trusted by over 100,000 businesses to securely manage and collaborate on company files and data in the cloud — including highly sensitive documents like contracts, financial records, and proprietary information. However, despite its advanced security features and file versioning, Box is still vulnerable to data loss. Human error, malicious attacks, ransomware, and problematic integrations can all put your clients' critical data at risk. That's why it's crucial for organizations to protect against potential Box outages and data loss by securing a cost-effective, reliable backup solution outside of Box.

Introducing Box Backup, Built for MSPs from Day One.

SaaSAssure offers a comprehensive solution to automatically protect your clients' Box data from all forms of data loss, whether caused by human error, malicious attacks, or technical failures. With an intuitive, easy-to-use modern console, SaaSAssure keeps data protected and compliant with industry-first security features. Built from the ground up with MSP-friendly features like multitenancy, customizable dashboards, seamless billing integration, and flexible storage options, SaaSAssure is designed to make data protection effortless and efficient.

With SaaSAssure, not only are vital company cloud documents safe, you're also expanding the protection of the entire SaaS footprint, ensuring all valuable business data is protected. SaaSAssure gives organizations peace of mind knowing important cloud generated data is protected, no matter what.

Security First Data Protection

- **Industry 1st – Multiperson Approval:** Requires two or three admins to approve data destructive tasks.
- **AES 256-bit Encryption:** Full encryption in-flight and at-rest to protect backup data from unauthorized access.
- **Multifactor Authentication:** Use any Time-based One-time Password (TOTP) tool to protect against access from compromised credentials.

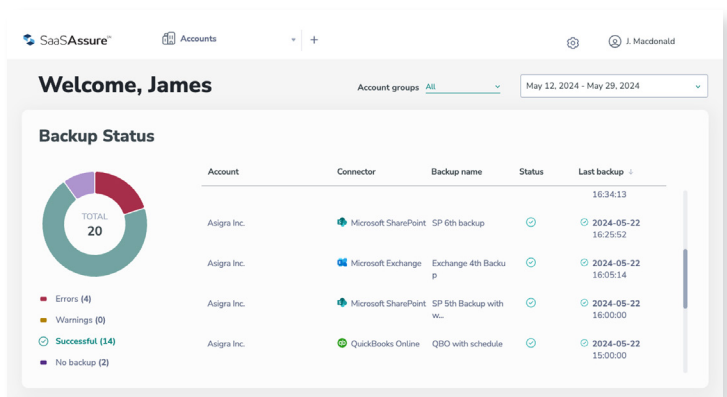

Efficient Backup & Recovery

- **Incremental Forever Backup:** Reduce backup job size and time with incremental backups.
- **Full Data Set:** Box backup includes all data types including folders, metadata, comments, users, etc.
- **Manual Restore:** Contact SaaSAssure for recovery assistance.

Ease of Use & Flexibility

- **Simplified UI:** Straightforward interface means initial setup takes less than 5 minutes, and most daily tasks take less than 4 clicks.
- **Customizable Dashboards:** Dashboards can be organized by geography, client, client group, business unit or any other organizational structure.
- **Storage Flexibility:** Backups can be sent to the SaaSAssure cloud or any S3 compatible storage to meet regional data sovereignty needs.

Box Data Protection:

How SaaSAssure Compares to the Rest

Box Recovery: Common Industry Features

- Limited file versioning
- May not capture metadata
- Outdated, cumbersome user interfaces not designed for MSPs
- Confusing usage reporting
- Lack of storage options
- Security limited to encryption and multifactor authentication

Box Recovery: SaaSAssure Platform

- Automated backup, set up in less than 5 minutes
- Incremental backups
- Data encrypted in-flight and at-rest
- Backup jobs organized by client group makes it easy to find data within dashboard

About SaaSAssure

Total control over data, or data sovereignty, solves many problems. However, backing up the fast-growing mountain of data from SaaS apps is a daunting task. Partial solutions only paper over the need for future work. What's needed is a way to close data gaps, keep up with data growth, and even make comprehensive backups stable and secure not just now but in the future. SaaSAssure helps businesses of all sizes accomplish that.

“FOR CUSTOMERS WHOSE SAAS DATA IS NOT JUST VALUABLE BUT VITAL, THE INTRODUCTION OF ASIGRA'S SAASASSURE IS A GAME CHANGER, THE SIMPLICITY AND RAPID DEPLOYMENT CAPABILITIES OF THE PLATFORM PROVIDES SLICK DATA PROTECTION THAT SCALES EFFORTLESSLY. THIS ISN'T JUST A TOOL—IT'S AN ESSENTIAL PART OF MODERN DIGITAL RESILIENCE AND WE ARE EXCITED TO INTEGRATE THIS COMPREHENSIVE SOLUTION INTO OUR SERVICE PORTFOLIO AND BRIDGING THE SAAS DATA PROTECTION GAP.”

Gregg Mehr,
Chief Technology Officer, DataHEALTH
