

MSP-Ready Secure SaaS Backup & Recovery

“ IN NO EVENT WILL EITHER PARTY BE LIABLE FOR ANY INDIRECT, INCIDENTAL, CONSEQUENTIAL, OR PUNITIVE DAMAGES OR LOSS OF PROFITS, REVENUE, OR DATA.”

Common T&Cs provided by SaaS Vendors

Benefits for Managed Service Providers

- Multitenant support increases backup and recovery efficiency
- Comprehensive dashboard allows admins to monitor job status by client
- Detailed client usage reports to simplify billing admin processes
- Multiperson Approval prevents unauthorized access and data loss from human error

Core Capabilities

- Comprehensive SaaS support ensures all critical client data is protected
- Highly secure architecture protects client data from human error and attackers
- Modern UI simplifies backup and restore processes improving workload and efficiency
- Storage flexibility allows client data to be stored where needed to meet client needs for compliance

Is your choice of SaaS protection comprehensive enough? May be time for a rethink ...

The typical SaaS data protection tools available for MSPs were designed for a few of the most common SaaS services (Microsoft 365 / Salesforce) and built out of complex enterprise solutions. These tools often fail to account for the dozens of mission-critical SaaS services clients use in their hyper-connected business operations. Often, these solutions are cumbersome and require several steps increasing recovery time and costs. Additionally, they often weren't designed to protect against today's sophisticated cyberattacks, which now frequently target SaaS data as a prime asset. There must be a better way to ensure the recovery, security and compliance of your clients' entire SaaS footprint.

Discover Reimagined SaaS Data Protection: Built for MSPs from Day One

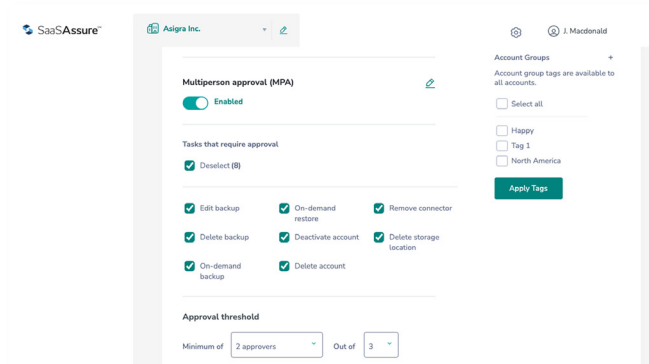

SaaSAssure transforms SaaS data protection for MSPs with a modern interface enhancing admin efficiency in managing client backup and recovery operations, while also boosting cloud security posture. The SaaSAssure platform supports a wide range of critical SaaS services, providing clients with comprehensive protection for all of their high-value cloud data.

By focusing on usability, security, and flexibility, SaaSAssure streamlines data protection processes and promotes MSP business growth and profitability. SaaSAssure's competitive pricing enables MSPs to deliver greater value to clients while securing a greater share of wallet and driving loyalty.

SaaSAssure Core Features

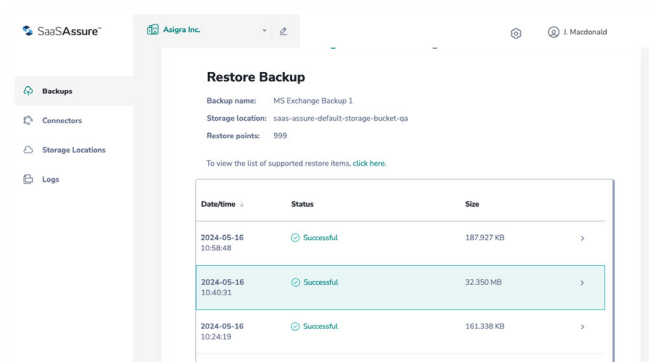

Security First Data Protection

- **Industry 1st — Multiperson Approval:** Requires up to three admins to approve data destructive tasks.
- **AES 256-bit Encryption:** Full encryption in-flight and at-rest to protect backup data from unauthorized access.
- **Multifactor Authentication:** Use any Time-based One-time Password (TOTP) tool to protect against access from compromised credentials.

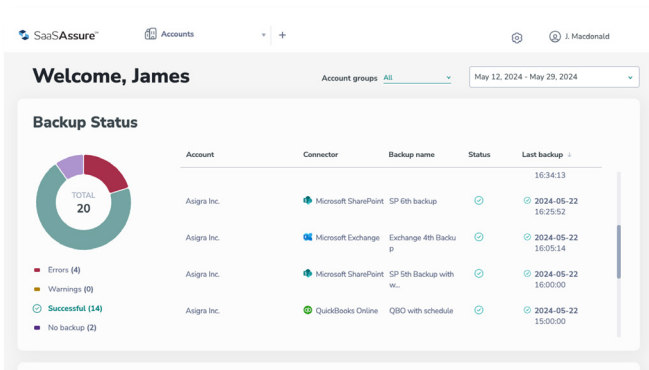

Efficient Backup & Recovery

- **Incremental Forever Backup:** Reduce backup job size and time with incremental backups.
- **Full Restore:** Restore the full SaaS data set at once.
- **Point-in-time Restore:** Choose from up to 999 previous points in time to restore.

Ease of Use & Flexibility

- **Simplified UI:** Straightforward interface means initial setup takes less than 5 minutes, and most daily tasks take less than 4 clicks.
- **Customizable Dashboards:** Dashboards can be organized by geography, client, client group, business unit or any other organizational structure.
- **Storage Flexibility:** Backups can be sent to the SaaSAssure cloud for free, unlimited storage or any S3-compatible storage to meet regional data sovereignty needs.

SaaS Data Protection:

How SaaSAssure Compares to the Rest

SaaS Data Protection with Others

- Protection for Big 3 only (Microsoft, Salesforce, Google Workspace)
- Outdated, cumbersome user interfaces
- Confusing usage reporting
- Lack of storage options
- Security limited to encryption and multifactor authentication

SaaS Data Protection with SaaSAssure

- Supports 10 SaaS apps and growing
- Modern, easy to use UI
- Simplified dashboards
- Built-in usage billing reporting
- Storage flexibility
- Security includes industry first Multiperson Approval and Role-based Access Controls

About SaaSAssure

Total control over data, or data sovereignty, solves many problems. However, backing up the fast-growing mountain of data from SaaS apps is a daunting task. Partial solutions only paper over the need for future work. What's needed is a way to close data gaps, keep up with data growth, and even make comprehensive backups stable and secure not just now but in the future. SaaSAssure helps businesses of all sizes accomplish that.

“FOR CUSTOMERS WHOSE SAAS DATA IS NOT JUST VALUABLE BUT VITAL, THE INTRODUCTION OF ASIGRA'S SAASASSURE IS A GAME CHANGER, THE SIMPLICITY AND RAPID DEPLOYMENT CAPABILITIES OF THE PLATFORM PROVIDES SLICK DATA PROTECTION THAT SCALES EFFORTLESSLY. THIS ISN'T JUST A TOOL—IT'S AN ESSENTIAL PART OF MODERN DIGITAL RESILIENCE AND WE ARE EXCITED TO INTEGRATE THIS COMPREHENSIVE SOLUTION INTO OUR SERVICE PORTFOLIO AND BRIDGING THE SAAS DATA PROTECTION GAP.”
